# BLACK

*Pond Dye with Suspend Technology*

## **BLACK Lake & Pond Colorant w/Suspend™ Technology - 1 Gallon**

"A Shallow Water Solution"- Enhance and Create DEPTH to protect your body of water.

Black - Treat your Lake or Pond Water with a Beautiful and Natural Lake Color

Black Lake & Pond liquid formula densely covers your body of water with a rich natural water color. This unique formula will enhance aesthetics in shallow water conditions by providing a protective color to the water column.

- ◆ Suspend™ technology is a proprietary process that mechanically changes the dye molecule. By reducing its particle size, the dye is protected from fallout. This adds longevity in solution affecting color, the treatment duration and providing improved shelf life.
  - ◆ Eco-Safe-Easy to use environmentally friendly, water-soluble dye.
  - ◆ Formulated with Suspend technology for complete solubility and water column coverage.
  - ◆ The Eco-Safe Choice for Pond Owners, Aquatic Managers and Golf Course Professionals
    - ◆ No irrigation or water restrictions
    - ◆ Nontoxic-Safe for fish and all wildlife.
    - ◆ Made in The USA.

Give your lake, pond or fountain a beautiful, natural dark color with this blend of Eco-Safe environmentally friendly, nontoxic, water-soluble liquid dye. This highly concentrated formula is designed to enhance depth in shallow water conditions. Depth protection is a key component to a clean and healthy lake.

### **DIRECTIONS:**

Each Gallon is formulated to treat 1 full acre of water 4-6 ft. in depth. Easily pour in each gallon at several points around the lake or pond. Watch as it quickly spreads throughout the water column in just a matter of hours. Water temperature and degree of agitation can influence dispersion of BLACK Lake & Pond Colorant. For 1 Acre of water 4-6 ft. deep use 1 Gallon BLACK Lake & Pond Colorant. There are NO irrigation or water restrictions.

*Packaged 4/1 per case. 144 cases per pallet. 2011 The ECO-Safe Pond 2.0 Professional Pond Program. All rights reserved.*

### **Helpful Hints Section**

- 1) Treatments should begin as soon as possible for new ponds.
- 2) To achieve optimum performance, dyes should be applied all year long. Intervals of 60-90 days are preferred. Rainfall, evaporation and runoff can impact this schedule. Treat to desired color.
- 3) Dyes can be added to ponds in winter season, even when the pond freezes over. These treatments protect the pond water from first thaw maladies.
- 4) Water color can be affected by floating particulate. Turbid water conditions contribute to poor aesthetics but can also alter the color of this product. Re-treat body of water until you achieve your desired water color.
- 5) This product is Eco-safe and will NOT cause harm to environment.
- 6) For cleanup or spills, wash hands or clothes with soap.
