

# N-Vest® Oat-Radish Mix

A Division of The CISCO Companies

## What is it?

N-Vest® Oat-Radish Mix consists of high quality oat seed plus proven Scav-N-Ger® radish. This mix is a nutrient scavenger. It is great for a novice cover cropper, or the most experienced.

## Benefits:

- Soil tilth builder and nutrient scavenger
- Winterkills for easy management
- Great for biomass and erosion control
- Great crop for all experience levels
- Produces excellent cover to suppress winter annuals
- Mycorrhizal fungi in oat roots improves soil structure

Ready to plant in spring

Excellent cover for weed suppression

Provides prolific forage

## Planting tips:

Planting Rate: 45-50#/acre

Planting Depth: 1/2—3/4"

Planting Time: July to early September

(plan on planting at least 6 weeks before killing frost)
