

Hay & Graze Clover Mix

FEATURES

- Mix of outstanding clovers formulated at just the right percentage to give the best benefit for production livestock managers
- Overseed grass pastures
- Great for frost seeding
- Proper formula of red to white clover
- Helps dilute endophytic fungus in native fescue

PERENNIAL MIX FEATURES

Plant type: Perennial mix
Planting dates: Frost seed mid Feb–mid March, Spring seed April–mid May, Summer seed Aug–mid Sept
Soil pH: 6.0–7.0
Soil adaption: Wide
Planting depth: 1/8”–1/4”
Approximate seeds/lb: 183,000
Seeding rate: 5–8 lbs/A
Days to germination: 7–14
Main usage: Pasture, baling
Height at maturity: 3’–4’
Length of stand: 2–3 years
Reproduces by: Seed

FORMULATION

70% Gallant Red Clover
30% Kopu II White Clover

“Mixing red and white clover together is more productive for animals than either straight red clover, or straight white clover.”
- Gary Lacefield, University of Kentucky Forage Agronomist

Enduro-Plus consists of only the best forage varieties available. All varieties in the Enduro-Plus product line have been developed and tested for forage quality, yield, and persistence. These products have been designed to give you higher relative feed values, which translates into more milk per acre, more beef per acre, or more energy for horses.
