

Premium Shade Mix

FORMULATION

- 20% Proprietary Creeping Red Fescue
- 20% Proprietary Chewings Fescue
- 20% Proprietary Hard Fescue
- 20% Proprietary Perennial Ryegrass
- 20% Proprietary Kentucky Bluegrass

NOTABLE CHARACTERISTICS

- Dark green color
- Fine textured leaf blades
- Excellent disease resistance
- Use in dense shade to moderate sun
- Best shade tolerance on the market
- Varieties selected for shade tolerance
- Lower maintenance required

Premium Shade Mix includes only varieties that have excellent to very good ratings in NTEP* trials for disease ratings, genetic color, density and over-all turf quality. Premium Shade is an excellent blend for new lawns.

SEEDING RATE

New Lawn 4-6 lbs/1,000 sq. ft. or 250 lbs/A
Overseeding 2-3 lbs/sq. ft.

| | |
|-----------------|--------------------|
| Sunlight needed | Moderate Shade-Sun |
| Soil Types | Clay to Sand |
| Maintenance | Medium |
| Fertility | Medium |
| Traffic | Good |

NOTES ON PROPRIETARY FINE FESCUES:

Mixing fine fescues for shade tolerance is recommended by the Turf Department at Rutgers University. Fine Fescue varieties in Execu-Turf® Mixes and Blends are very shade tolerant, and very attractive. Varieties in Premium Shade provide excellent turf quality and much improved disease resistance versus “low-end” or “common” varieties. Proprietary Fine Fescues used in Premium Shade also exhibit improved traffic tolerance.
